

INTRODUCTION

CORN CLUB founded in 2002, with staff count reaching 80, has already established as an experienced and dedicated company known for providing high quality, A Grade, fresh and processed biotech agricultural products especially Sweet Corn and Green Peas in India. Today **CORN CLUB** is a renowned brand with presence in all major Indian cities and abroad. Our success is due to our hard work, research, quality control and ability to maintain consistency from the farm fields in rural India to the production tables. We supply to all major and minor retailers in India like Spencer's, Reliance, Big Bazaar, fresh@, More and Foodworld.

Our horticulture team strive to give you a non-toxic food through the latest biotechnological methods. Our experts in Research and Development Department are always striving to find better techniques to improve our product quality.

— *Everyday Healthy* — is our motto.

CONCEPT

Why Sweet Corn?

- Sweet corn is low in sodium and CHOLESTEROL free.
- One medium ear of corn yields 75 calories, 79 mg phosphorus & 4.7 mg vitamin C.
- Boiled sweet corn releases antioxidants. Antioxidants reduces the risk of cancer and age related diseases like cataract & Alzheimer.
- Boiled sweet corn also releases Ferulic Acid, not found in fruits and vegetables.
- Ferulic acid strengthens the body immunity system. It also helps to protect the skin from ultraviolet rays of the sun.

The American Chemical Society has obtained this above data from The Journal of Agriculture and Food Chemistry, Published.

Why Cup Corn?

- It requires only table space area.
- Very high in nutrition and health values.
- High potential for fast food chain business.
